NFit®

DUAL ACTION

GENERAL INFORMATION

NFit® Dual Action is intended to be used as a management tool to improve nitrogen availability and uptake. Use this product as an additive to a regular fertilizer program. NFit Dual Action is not intended to provide the nutrients normally required by agricultural crops.

DIRECTIONS FOR USE

Shake well before use.

Urea Blending: 64-96 fl oz per ton of urea

NFit Dual Action may be used to treat urea prior to application to the field - including pre-treatment. Under certain temperature and humidity conditions. urea blended with NFit Dual Action may stick together. Application of urea to the field is recommended soon after treatment to provide the best results. Conduct a jar test prior to application to test for compatibility.

Liquid Fertilizers: 48 fl oz per ton of UAN (28%, 30%, or 32%)

*For best results, use treated UAN solution soon after mixing.

NFit Dual Action may be mixed with liquid fertilizers such as aqua ammonia or other liquid ammoniacal or urea nitrogen fertilizers. Liquid fertilizers containing high levels of phosphate should not be used with NFit Dual Action. If pesticides are added to the tank mix in conjunction with liquid fertilizers, a compatibility jar test should be performed.

Liquid Manures: 13.5-18 fl oz per acre

NFit Dual Action may be mixed with liquid animal manures. NFit Dual Action may be applied to slurry pit or through an injection system as material is loaded into applicator.

STORAGE AND DISPOSAL

Store in a cool, dry place in original container. Keep container tightly closed. Do not reuse empty container. Triple rinse then offer for recycling or for disposal in a sanitary landfill, or by other means in accordance with local, state, and federal regulations.
